California Image and Design

We are your total website service provider. We are available for any project from website design through consultation on any internet project. Our specialties include: ColdFusion internet programming. Our programming skills allow us to create the most advanced sites to service all your requirements. SQL Database construction. The database allows us to create for you a back end database storage system for orders, customer information allowing you to run advanced marketing programs. HTML web design. We do it all from basic page construction to the development of complex domains with numerous pages. Complete email services. If you need a pop account like You@YourSite.com to use with Outlook through remote email access using a browser we can service your email needs. Website hosting. If you have a site you need a host, we do that too! (Inexpensively) From custom graphics, though marketing your site, we do it all.

Submit your inquiry and allow us the opportunity to help you. We can help make your website a valuable tool for growing your business. We can create or update your site enhance it with the power, knowledge, technology, marketing and creativity for your site to succeed!

-Expanded Marketing Information- Product Copy Image Map

Paragraph 1 (Brief Introduction)

The Dell PowerEdge is just the server for enterprises that require high availability, 24/7. The 2850 gets a performance boost from its fast hard drives and RAID controller with DDR2 memory, and its Intel Gigabit NICs with PCI Express are a nice touch.

Paragraph 2

Dell PowerEdge servers now with dual-core Intel® XeonTM Processors deliver up to 53% greater performance1.
